W. H. BEALL,
ASSISTANT SECRETARY

Sparta, Kentucky

February, 11, 1930.

TO THE TRADE:

The following kinds and sizes of grafted evergreens are offered for delivery in the spring of 1930. Junipers are grafted on Junipers. Grafts are ready for shipment in April and May. For this latitude, May is a better month for planting. The one year and two year grafts are ready for shipment whenever the digging season opens, usually about the tenth of March. Samples will be furnished upon request.

	<u>Grafts</u>	<u>1 Year</u>	<u>2 Year</u>
Chamaecyparis lawsoni alumi	.50	.75	
Juniperus chinensis albo variegata	.40	.55	1.00
" " pfitzeriana	.35	.50	.75
" " Smithi	.45	.60	1.40
" " sylvestris	.40	.55	1.00
" depressa plumosa	.50		1.25
" excelsa stricta			1.00
" japonica	.40	.55	1.00
" sabina fastigiata	.50	.75	1.50
" virginiana cannarti	.50	.75	
" " elegantissima	.50	.75	1.25
" " glauca	.40	.55	1.25
" " pendula	.40	.55	1.25
" " pyramidalis	.50	.75	1.25
Thuja occidentalis columbia	.35		1.00
" " douglasii aurea	.35		
" " elegantissima	.35		1.00
" " rosenthalii	.35		
" orientalis aurea nana	.25		.60
" " conspicua aurea	.25		
" " beverleyensis	.25		
" " daily nana	.25		

One year grafts are not recommended for the reason that grafts grow but little the first season. The two year grafts are 12-18" in dwarf varieties and 18-24" in pyramidal plants. The two year Juniperus virginiana glauca and Juniperus chinensis Smithi are specially good plants. Both one and two year plants are shipped balled and burlapped.
